Appendix - Definitions

• **Deficiency**
  - A “deficiency” exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that even if the control operates as designed, the control objective is not always met. A deficiency in operation exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or qualifications to perform the control effectively. Deficiencies may involve one or more of the five interrelated components of internal control.

• **Significant Deficiency**
  - A “significant deficiency” is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

• **Material Weakness**
  - A “material weakness” is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity’s financial statements will not be prevented, or detected and correct on a timely basis.

• **Fraud**
  - The term “fraud” includes “misstatements” arising from fraudulent financial reporting and misstatements arising from misappropriation of assets.
  - “Misstatements” arising from “fraudulent financial reporting” are intentional misstatements, or omissions of amounts or disclosures in financial statements intended to deceive financial statement users.
  - “Misstatements” arising from “misappropriation of assets” involve the theft of assets where the effect of the theft causes the financial statements not to be presented in conformity with GAAP.
  - The University is responsible for the design and implementation of programs and controls to prevent and detect fraud.
