A note about computing at SSU:

Shawnee State offers wireless technology across campus that students can access from classrooms to living rooms. More and more students are bringing personal computers to campus and we want to ensure that students are successful in connecting their personal computers to the SSU network. We provide a minimum hardware standard for connecting to the network and to ensure that networked resources can be accessed efficiently, students should reference these standards when making a computer purchase. The standards can be viewed on the UIS website at www.shawnee.edu/uis.

What you'll need (to receive UIS support):

- A computer that meets or exceeds minimum network standards
- A computer running Windows XP, Windows Vista, or Mac OS X
- A network cable for residential students (available in the SSU bookstore)

What is provided:

- Wireless access across campus
- One wired connection (in your room) for each residential student
- A FREE copy of Symantec Endpoint Protection Antivirus
- Student discounts on Windows operating systems and Microsoft Office
- A safe, secure, and easy-to-use computing environment
- Timely support from a UIS technician when assistance is needed

Learning to study, take notes, read your textbooks and manage your time are just a few of the issues that new students face in college. Below are a few tips on the path to academic success.

Academic Tips

- Be sure to buy all the books required for class and read them
- Learn the syllabus for each class.
- Keep a calendar with daily activities. (class, work and study time)
- Plan a definite study time into each day.
- Keep up with your reading.
- Go to class every day!
- Arrive to class early and review notes.
- Sit in the front rows of class.
- Learn how to take good notes.
- Study your notes right after class.
- Find a quiet place to study, free of clutter and distractions.
- Tutoring is for everyone!
- Don't skip class.
- Know where the library is and how to use it.
- Form a study group with fellow students and friends.
- Talk to your professors.
- Don't cram for hours the night before. Break up your studying into segments.
- And again, go to class!
