

Prior Authorization Drug List

Most prescriptions are filled right away when you take them to the pharmacy. But some drugs need to be reviewed by your health plan before they're covered. This process is called prior authorization. Prior authorization focuses on drugs that may have a risk of side effects, a risk of harmful effects when taken with other drugs, potential for incorrect use or abuse, better options that may cost you less and work better, and rules for use with certain health conditions. The drugs listed below need to be reviewed and approved by your health plan before they're covered.*

Category	Brand name
